Purview ViVA™

Share, view, store, and integrate medical images

Purview ViVA

Purview is a new generation imaging delivery platform enabling physicians easy and affordable access to medical images as an integrated part of their patient's complete health record.
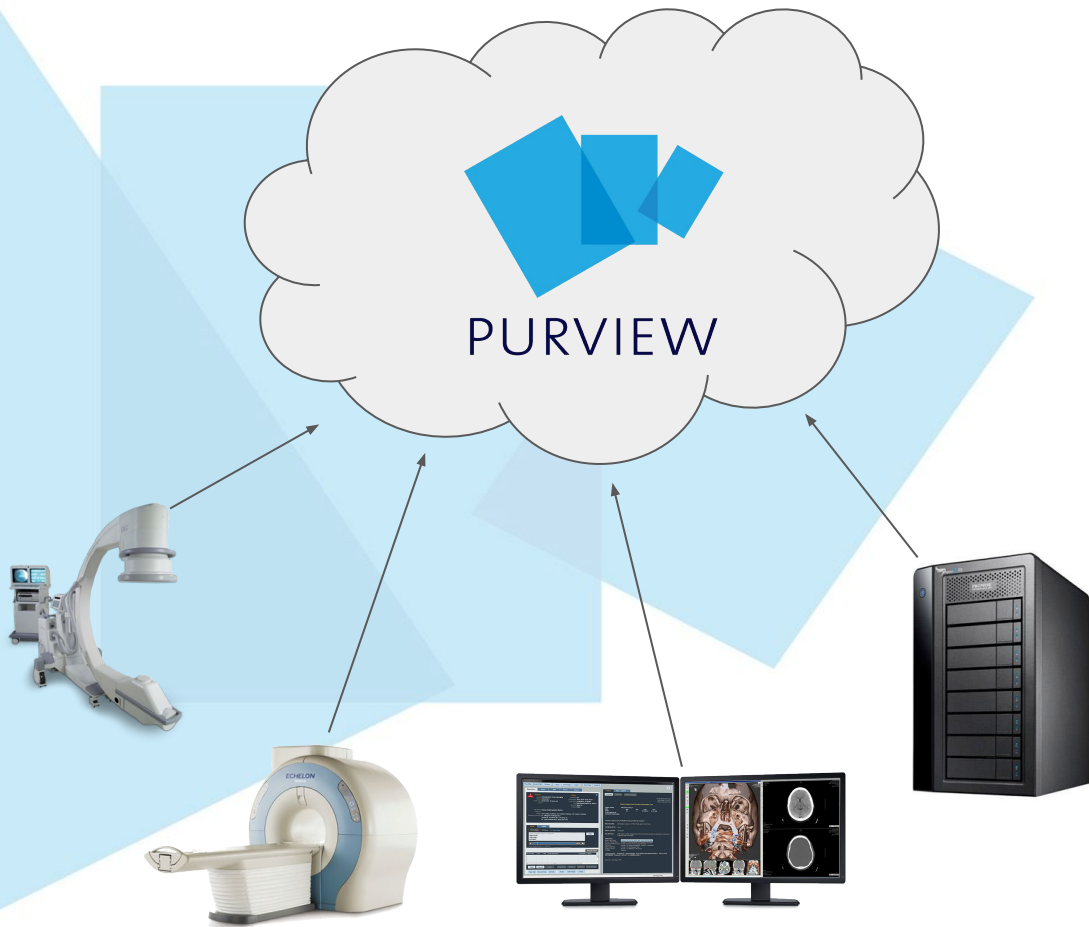

Purview ViVA

- **Access:** extend access to referring physicians and patients

- **Sharing:** use a simple link to electronically share images and reports

- **Security:** secure HIPAA compliant communication channels and storage

- **Storage:** unlimited capacity that scales with your needs

- **Viewing:** view your images anytime anywhere on any device

- **Flexible:** avoid technology obsolescence

Step 1 - Connect

Purview will connect your modalities, existing PACS and viewing workstations via a secure connection to your ViVA™ cloud account.
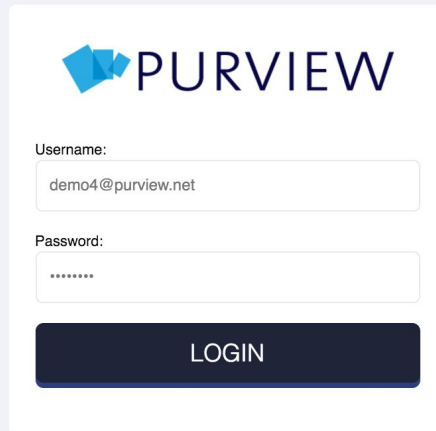

Step 2 - Access

View medical images on your existing viewing station, web browser, smartphone, or tablet.

Share and collaborate with physicians and patients.

Purview ViVA Log-In

LOGIN

Launching Purview ViVA

Access your cloud!

Search patient's first name, last name or patient ID.

With multiple patient studies, search within those studies as well.

Purview ViVA Tools

- **View:** view a study anytime, anywhere, on any device on our FDA approved universal viewer

- **Share:** share this study with another physician or patient

- **Download:** download a study to your viewing workstation

- **CD:** publish a CD

View | Share | Horos / OsiriX | Launch | Download | CD
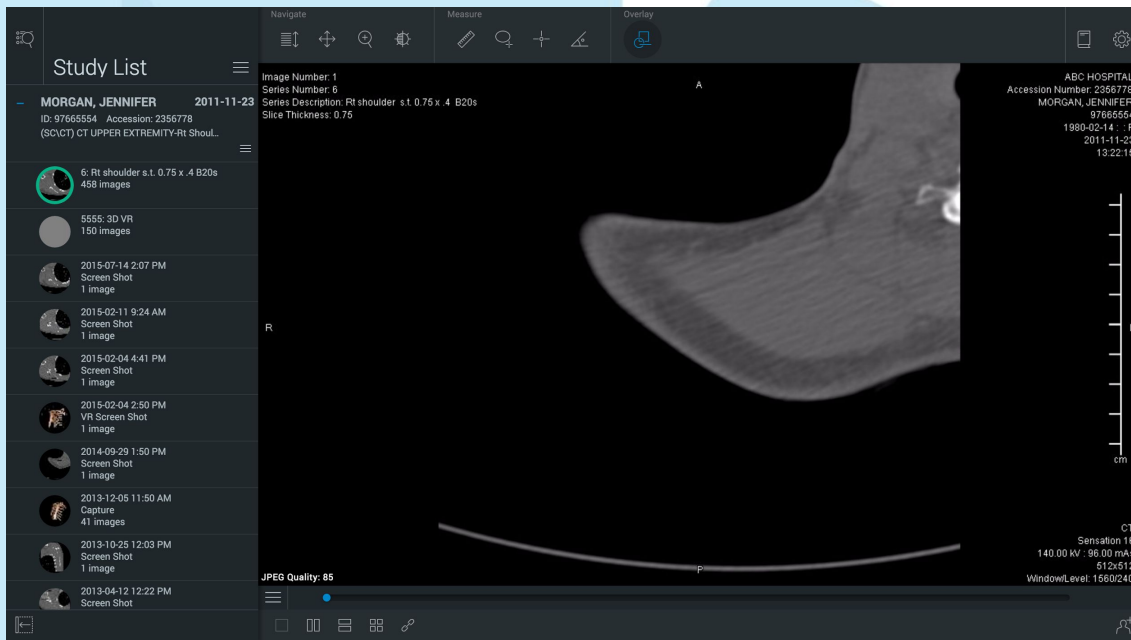

Launching the Universal Viewer

Launch a universal viewer that will stream the images over the internet. No patient data is downloaded ensuring a secure and private view.

Study Browser

| 10 | records per page |

Universal Viewer

Our universal viewer provides powerful navigation and measurement tools.

- Window leveling
- Linear Measurement
- Compare current/prior studies
- 3D MIP/MPR
- 3D volume rendering

Powerful yet Simple Measurement & Navigation Tools

- Image Slice Scrolling
- Pan
- Zoom
- Window Leveling

- Linear measurement
- ROI measurement
- Point measurement
- Angle measurement

Navigate

Measure

Comparing Images

Compare current and prior images side-by-side and link them for easy evaluation.

Up to 4 series in the same viewer, including cine video playback.
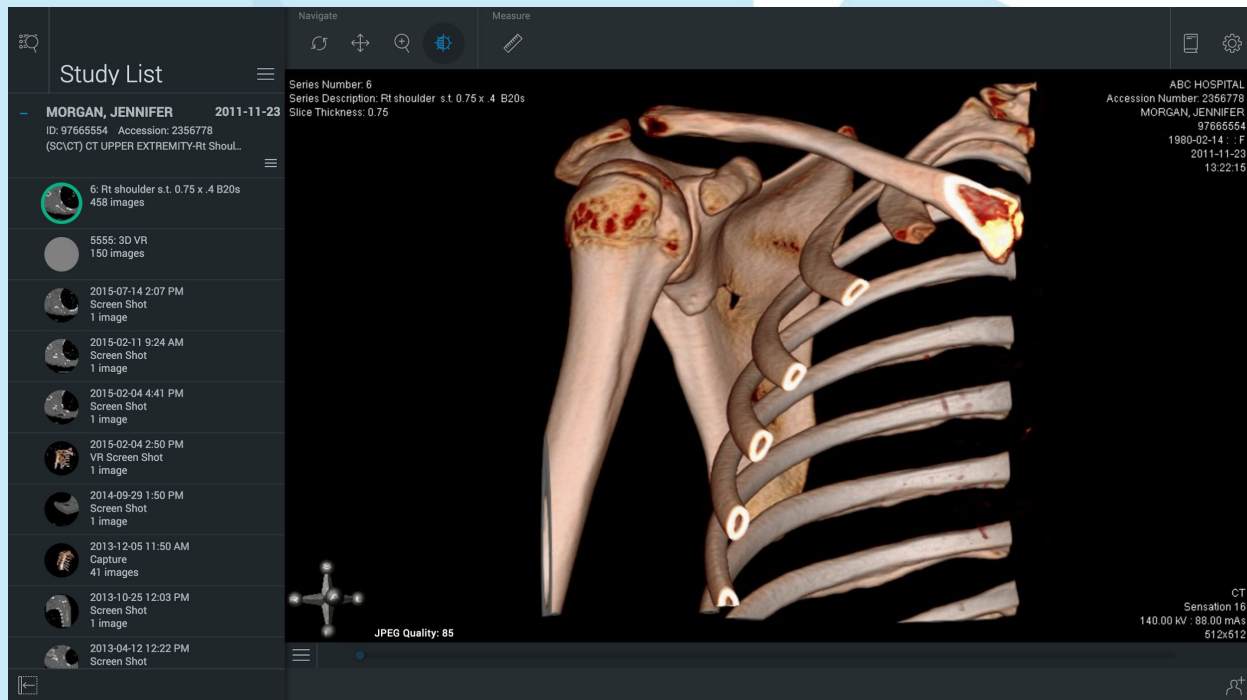

3D MIP/MPR

Navigate 3D studies with multiplanar reconstruction (MPR).

3D Volume Rendering

Perform 3D volume rendering and segmentation on any web-browser or mobile device.

Collaboration in Real Time

Collaborate with other physicians in real time with simultaneous views

Step 3 - Share Medical Images

Share with Referring Physicians

Create personalized login for your referring physicians to share patient images and reports.

Modality	Study Description	Physician	Report
CR	+ PPD	SMITH^^^^	New I Mark as read Study Notes
MR	C_spine^canine	SMITH^^^^	New I Mark as read Study Notes
MR	RM CRANEO SIMPLE	SMITH^^^^	New I Mark as read Study Notes

Search within results: SMITH

Share with Referring Physicians

Use secure URL links for temporary viewing or to download a study.

Patient Access

Provide instant web-based patient access to images and reports.

No need to burn CDs!

Purview™ gives you and your doctor secure and convenient online access to your medical images.

You control your medical images. View them, store them, share them with your doctors.

How?

In most cases the results of your imaging study will be sent directly to your doctor. Use this access code instead of a CD to access your study results and share with any of your doctors electronically.

1. Go to **clinicname**.purview.net
2. Click "I am a patient"
3. Enter your unique access code

Your Unique Access Code

EHR/EMR Integration

Connect images with patient data.

Purview creates a seamless connection between your EHR system and medical images.

Launch images directly from the patient record.

Horos Integration

Purview offers technical and operational support for Horos and provides a seamless connection with the Purview ViVA cloud.

Launch Horos and query your images directly from within Purview ViVA.
